

SDS3300
UV

The **Skyjet SDS3300** is a 3.2-meter wide UV printer with synchronized double-sided printing, capable of running two independent single-sided print jobs simultaneously or one double-sided job, significantly reducing production time and increasing printing efficiency.

1. ■ Unmatched advantages:

- ◆ The **SDS3300** offers two distinct printing solutions:

- **Independent Single-Sided Mode**

- Operates as two independent single-sided printers, enabling simultaneous printing on two different types of materials — ideal for maximizing productivity and versatility.

- **Synchronized Double-Sided Mode**

- Functions as a synchronized double-sided printer, ensuring perfect front-to-back alignment for high-quality double-sided output.

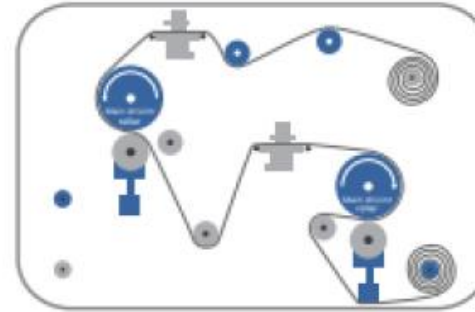

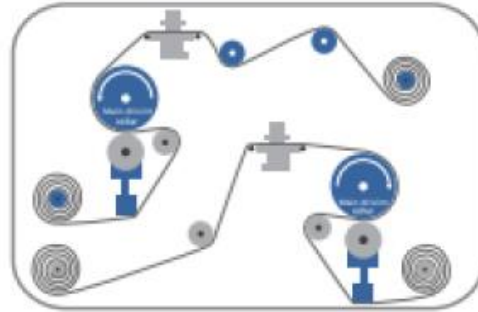

- ◆ The multi-point alignment system ensures **100% accuracy in double-sided printing**, delivering perfectly aligned results every time.

- ◆ **Space Efficiency:** Delivers the printing capacity of **two machines in one**, significantly reducing the required floor space and optimizing your production layout.

- ◆ **Cutting-Edge Technology:** Equipped with **Konica 1024i printheads**, the SDS3300 delivers **high resolution and fast printing speeds**. Compatible with a **wide range of materials**, it ensures exceptional versatility across diverse applications.

2. Operating structure:

Dual Independent
Printing Path

Dual Independent
Printing Path

3. Revolutionary Double-Sided Printing:

- ◆ Overcome the limitations of traditional printing methods with **double-sided printing**, ideal for achieving the **day/night effect** and ensuring consistency across different types of materials.
- ◆ **Reduce time and costs** associated with conventional methods.

4. Technical specifications:

- ✓ **Double-sided printing** capability.
- ✓ Media take-up system with constant tension, **ensuring perfect alignment**.
- ✓ **Time savings** thanks to the new software design, allowing composition and use of different ICC curves within the same printing process.
- ✓ **Automatic logging of print data**, enabling better cost control and production analysis.

5. Applications:

- ◆ Lightbox
- ◆ Day/Night Effect
- ◆ Double-sided Banner
- ◆ Multi-layer Printing
- ◆ Double-sided Hanging Flag
